ENGINEERING EQUIPMENT

- *A. Additional blueprint storage is required for outline and assembly drawing reference prints. Two 5 drawer files and dividers are requested for this purpose (Mayline Model 7767C). \$ 700
- B. A vairable intensity light source is required for lighted keyboard and panel measurements of contrast ratios in a simulated sunlit environment. At present, a movie light is being used for sun simulation, presently an impossible calibration and accuracy problem. \$6,000
- C. Paint thickness measuring equipment is needed in order to reduce lighted keyboard and panel toning operations. This instrument will aid in producing repeatable illumination by quantifying paint layer thicknesses, and reducing the custom "check and tailor" operations now required on lighted units. \$1,300
